Experience

Frontend

I have experience in front-end development using HTML, CSS, JavaScript, and React, creating responsive, interactive, and user-friendly web applications with a focus on clean design and functionality.

Backend

I have experience in back-end development using Node.js, Express.js, and databases, building secure, scalable, and efficient server-side applications, REST APIs, and database-driven systems.

Databases

I have experience in database management using MySQL, PostgreSQL, and MongoDB, designing, querying, and managing databases to ensure efficient data storage, retrieval, and integrity.

Education

2024

AASTU

Bachelor of Softawre Engineer

I am a Software Engineering student with a strong passion for technology, problem-solving, and software development. I have hands-on experience in front-end development, back-end development, and database management, with a growing ability to design, develop, and maintain full-stack web applications. Through academic projects and personal learning, I have developed a solid foundation in programming, software design, and system development. I enjoy transforming ideas into practical digital solutions that solve real-world problems while continuously expanding my technical knowledge and improving my skills. I am a motivated, self-driven, and dedicated learner who values teamwork, creativity, and continuous improvement. My goal is to become a professional software engineer, contribute to innovative projects, and use technology to create meaningful solutions that make a positive impact on businesses and communities.
